

Git Hands-On Lab Report

Objective

Configure Git, integrate Notepad++ as the default editor, initialize a Git repository, create a file, stage it, commit it, and verify the repository status.

Step 1: Verify Git Installation

Command:

```
git --version
```

Expected Output:

```
git version 2.46.x.windows.1
```

Step 2: Configure Git Username

Command:

```
git config --global user.name "Rekha Sakipalli"
```

Output:

```
Username configured successfully.
```

Step 3: Configure Git Email

Command:

```
git config --global user.email "rekhasakipally@gmail.com"
```

Output:

```
Email configured successfully.
```

Step 4: Verify Configuration

Command:

```
git config --global --list
```

Observed Output:

```
user.name=Rekha Sakipalli
```

```
user.email=rekhasakipally@gmail.com
```

```
core.editor='C:/Program Files/notepad++/notepad++.exe' -multiInst -nosession
```

Step 5: Open Git Configuration

Command:

```
git config --global -e
```

Output:

```
hint: Waiting for your editor to close the file...
```

```
.gitconfig opened in Notepad++
```

Step 6: Create Repository

Commands:

```
mkdir GitDemo  
cd GitDemo  
git init
```

Observed Output:

```
Initialized empty Git repository in C:/Users/REKHA/GitDemo/.git/
```

Step 7: Create File

Commands:

```
echo "Welcome to the version control" > welcome.txt  
ls  
cat welcome.txt
```

Observed Output:

```
welcome.txt  
Welcome to the version control
```

Step 8: Check Status

Command:

```
git status
```

Observed Output:

```
Untracked files:  
welcome.txt
```

Step 9: Stage File

Commands:

```
git add welcome.txt  
git status
```

Observed Output:

```
Changes to be committed:  
new file: welcome.txt
```

Step 10: Commit

Commands:

```
git commit -m "Initial commit"  
git status
```

Observed Output:

```
[master (root-commit)] Initial commit  
1 file changed, 1 insertion(+)  
create mode 100644 welcome.txt
```

On branch master

nothing to commit, working tree clean

Execution Screenshots

```

REKHARDESKTOP-784EM80 MINGW64 ~ (master)
$ cd GitDemo
REKHARDESKTOP-784EM80 MINGW64 ~/GitDemo (master)
$ git init
Initialized empty Git repository in C:/Users/REKHA/GitDemo/.git/
REKHARDESKTOP-784EM80 MINGW64 ~/GitDemo (master)
$ echo "welcome to the version" > welcome.txt
REKHARDESKTOP-784EM80 MINGW64 ~/GitDemo (master)
$ ls
welcome.txt
REKHARDESKTOP-784EM80 MINGW64 ~/GitDemo (master)
$ cat welcome.txt
welcome to the version
REKHARDESKTOP-784EM80 MINGW64 ~/GitDemo (master)
$ git status
On branch master

No commits yet

Untracked files:
  (use "git add <file>..." to include in what will be committed)
        welcome.txt

nothing added to commit but untracked files present (use "git add" to track)
REKHARDESKTOP-784EM80 MINGW64 ~/GitDemo (master)
$ git add welcome.txt
warning: in the working copy of 'welcome.txt', LF will be replaced by CRLF the next time Git touches it
REKHARDESKTOP-784EM80 MINGW64 ~/GitDemo (master)
$ git status
On branch master

No commits yet

Changes to be committed:
  (use "git rm --cached <file>..." to unstage)
        new file:   welcome.txt
REKHARDESKTOP-784EM80 MINGW64 ~/GitDemo (master)
$ git commit -m "Initial commit"
[master (root-commit) 190ed62] Initial commit
1 file changed, 1 insertion(+)
create mode 100644 welcome.txt
REKHARDESKTOP-784EM80 MINGW64 ~/GitDemo (master)
$ git status
On branch master
nothing to commit, working tree clean
REKHARDESKTOP-784EM80 MINGW64 ~/GitDemo (master)
$ |
```

Result

The Git Hands-On exercise was completed successfully. Git was configured, Notepad++ was integrated, the repository was initialized, welcome.txt was created and committed, and the working tree was verified to be clean.
